Assignment 2 – Completion Report

Roll number: FA24-BCS-068 | **Project:** Lama Retail replica (static + responsive pages, Bootstrap, JavaScript)
Reference site: Lama Retail – https://pk.lamaretail.com/ | **Date:** 29 October 2026

Requirements checklist

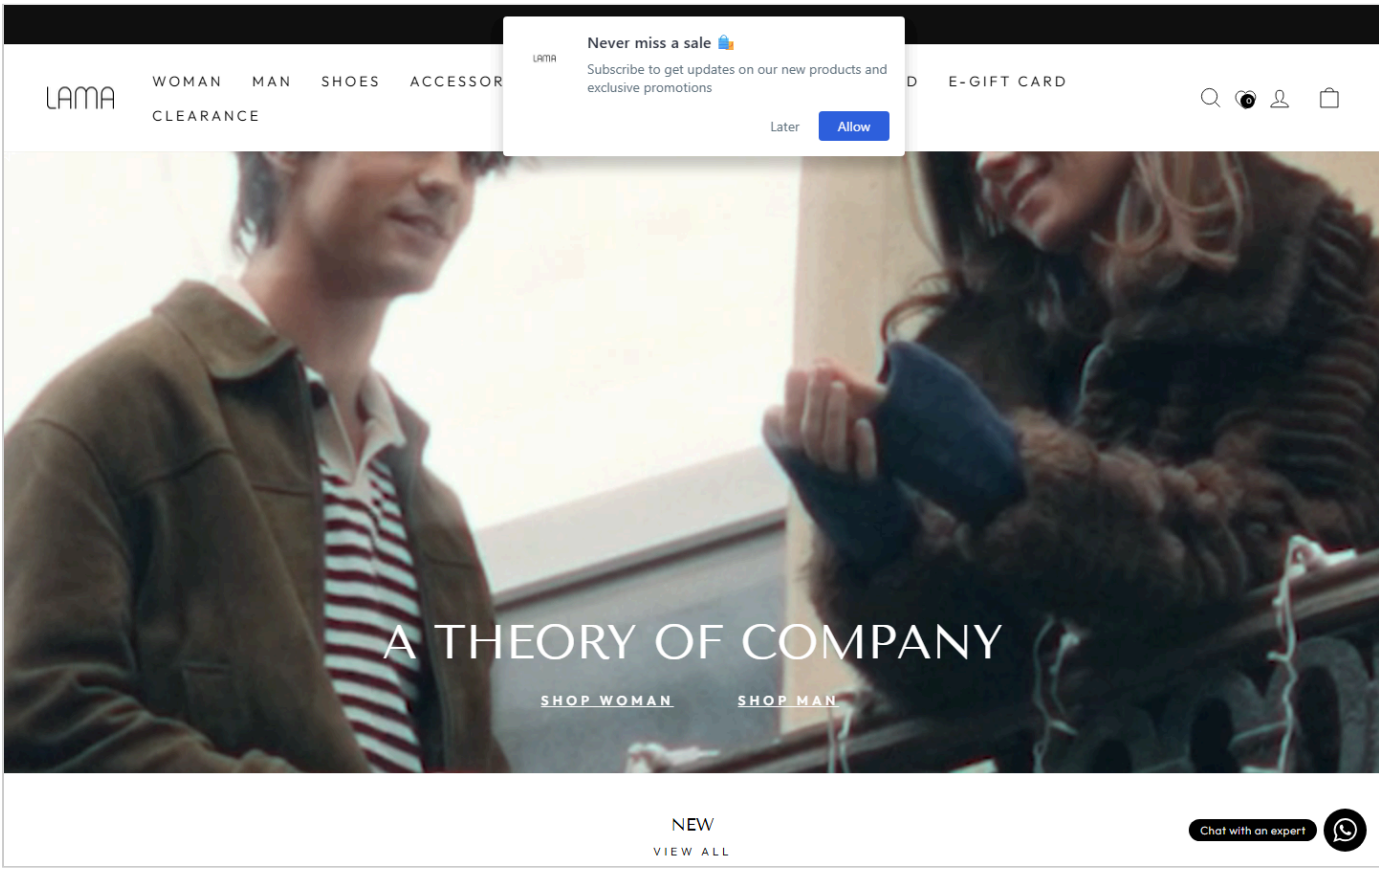

Requirement	How it is met	Status
Homepage with header: logo, nav bar, cart icon	index.html - Bootstrap navbar with LAMA logo, 8-item menu (mega dropdowns on desktop, slide-in menu on phones), search, account and cart icon with item count.	Done
Product cards: image, name, price, Add to Cart	25 product cards built from js/data.js, each with real photo, name, price and colour. The "+" button on each card opens a size picker with an "Add to Cart" button (it works: items go into the cart).	Done
Responsive grid of 8+ products	5 product rows (New, Shoes, Jackets & Coats, Sweaters & Cardigans, Bags), each a Bootstrap row with row-cols-2 / md-3 / lg-4 / xl-5: 2, 3, 4 or 5 cards per screen width; extra cards scroll sideways. The product page's "You may also like" is a wrapping Bootstrap grid (row-cols-2 row-cols-md-4).	Done
Product detail page: larger image, name, price, description, quantity selector, Add to Cart	product.html - large photo with thumbnails, name, price, BaadMay instalment, size buttons, quantity selector (- / + , 1-10), Add to Cart, Description / Size & Fit / Shipping accordions. Works for every product via product.html?id=...	Done
Consistent footer on both pages	Same footer markup on index.html and product.html: newsletter, links, currency, social icons, customer service, store locations, copyright.	Done
Layout with Flexbox and/or CSS Grid	Bootstrap grid (flexbox) for page columns, product rows and footer; CSS Grid for the product gallery; flexbox for header, cards and buttons. No table layout.	Done
Responsive at ~375px, ~768px and desktop	Mobile-first media queries + Bootstrap breakpoints. Screenshots of both pages at 375px, 768px and 1440px are on the following pages.	Done
Bootstrap or Tailwind doing real work (grid/layout + navbar)	Bootstrap 5.3.3: navbar (navbar, navbar-nav, nav-link, badge), grid (row, col-*, row-cols-*), breadcrumb, buttons, btn-check size buttons, input-group, form-control, form-select.	Done
JavaScript	9 vanilla JS files: menus, announcement slider, product rows, size picker, cart (localStorage), newsletter validation, product page.	Done
README with reference site name / URL / screenshot	README.md: Lama Retail - https://pk.lamaretail.com/ - screenshots/reference-site-lamaretail.png	Done
